100% Australian  
Family Owned Company

For over 20 years Austral Wire Products, a 100% Australian family owned company, has manufactured a diverse range of rural fencing products and has earned a reputation of being a quality focused and reliable supplier to the rural industry.

We are proud to now extend this to an exclusive relationship with Delfast Group in New Zealand, who specialize in Rural Tools to make fencing construction fast, safe and efficient, bringing World Class technology and solutions to Australia.

## The Delfast Story:

Rural, construction, and manufacturing are all industries at the heart of New Zealand. Working in New Zealand's climate and landscapes is unique and has its own challenges, but we're proud to be kiwis. It shapes our family, and it shapes our brand.

Grandpa was farming since high school, but in 1964 he made the decision to sell the farm to better support his family. Grandpa then moved his family to Palmerston North, where he developed his sales skills. In 1992, Delfast was started by Grandpa's sons, Andrew and Ian.

Through the relationships we've built with our end-users, we've been able to develop over 1000 product lines that are ideally suited to our end-users' needs. A pivotal point for Delfast was when we saw a need for a better fencing product than what was on the local market. So in 1998, we developed a contractors stapler that changed fencing forever; a product that would last and worked with New Zealand's unique conditions.

Grandpa's commitment to people has remained a key part of who we are. Our goal is to create an environment where people are confident to own the Delfast products they have.

To think smarter, not harder for our end-users; to make building the best, effortlessly.

# FEATURES THAT WORK AS HARD AS YOU:

The Delfast range of Staplers and staples have been developed to deliver exceptional performance, reliability and ease of use.

4.00mm

## RIBBED STAPLES + FUEL CELL

Delfast Ribbed Staples have a huge holding power, significantly better than that of both Plain and Barbed shank staples.

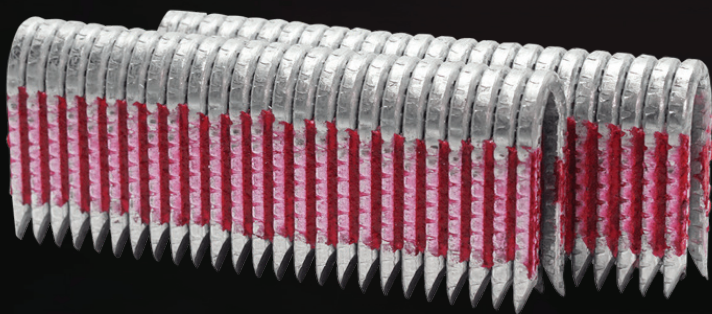

The entire length of the staple features a ribbed surface, providing a superior holding power. The super sharp divergent points, add to this.

All staples feature Class 4 (350g/m<sup>2</sup>) Galvanising and the patented Diamond Coating. This provides further holding power in timbers, and an extended life.
